

# How to Assemble Your Scratching Post

## What You Will Need

- Electric drill with Phillips Standard Bit #2  
OR Phillips head screwdriver
- A chair

## Contents

- Scratching post and base
- Four 3-inch screws, provided

## Instructions

1. Sit down on a chair. Turn the post upside-down, allowing the top of the post to rest on the floor while you grasp the bottom between your knees.
2. With the unfinished bottom portion of the base facing you, place two of the provided screws into the holes marked “1” and “2”.
3. Gently screw them through the base by hand and align the tips of the screws with the corresponding holes (also marked “1” and “2”) on the bottom of the post itself.
4. Drive the screws into the post until they are flush with the base. **Do not over tighten.**
5. Drive the two remaining screws into the remaining holes until flush.

## Ready to use!

Be sure to place your #scratchtastic post in a high-traffic area where your cats spend time. Use treats and toys to encourage them to give the post a try. Cats can also easily be clicker trained to use scratching posts.
