

# How to Assemble Your Balance Beam

## What You Will Need

- Electric drill with Phillips Standard Bit #2  
OR Phillips head screwdriver

## Contents

- Balance beam and feet
- Six 2-inch wood screws, provided

## Instructions

1. Identify the ends of your balance beam and correlating foot marked with a “1” or a “2” and pair them accordingly.
2. Place three of the provided screws into the holes on one of the feet to get them started.
3. Gently screw them through the foot and align the tips of the screws with the corresponding holes on the beam ensuring your “1” and “2” ends are matching.
4. Drive the screws into the beam until they are flush. **Do not over tighten.**
5. Repeat for the other end of the beam.
6. Tighten up all six screws and ensure level.

## Ready to use!

Your #scratchtastic balance beam can be used as a training prop, part of an agility course or simply as a horizontal scratcher. Use treats and toys to encourage them to give it a try. Do not force your cat onto the beam; they must decide to use it themselves for it to be a positive experience. Cats can easily be clicker trained and this makes a great addition to their training routine.
